Get Connected with Indy EAP

IndyEAP (Energy Assistance Program) assists with the high costs of home energy. Income-eligible families in Marion County are provided a one-time benefit to offset the high cost of winter utility bills. The program assists with electricity and heating but does not assist with water bills. The energy assistance benefit amount is based on household size, household income, at-risk factors, and fuel source.

Household Size	Last 3 Months Household Income Must NOT EXCEED
1	$8,658
2	$11,323
3	$13,987
4	$16,651
5	$19,315
6	$21,980
7	$22,479
8	$22,979

Household income is the gross earned income (and other unearned income) received by all household members aged 18 and above. Eligibility is based on total household income received during the previous three months.
